CSE3324 Design Document Rubric

Group # __4-2__   Design Version: __1__

Project __Studybook__   Score: __90__ of 100 pts

Format of Document (__24__ of 25 points)

    Document is formatted neatly and consistently. (__9__ of 10 points)

Headings not consistent across document.

    The document does not contain spelling and/or grammatical errors. (__10__ of 10 points)

    The document identifies the team members that will be responsible for each oral presentation and gives a workload assignment. (__5__ of 5 points)

Fulfillment of Requirements (__25__ of 25 points)

    The design document features classes that implement the functions labeled as required in the requirements document. (__15__ of 15 points)

    The overall organization of the classes is adequate and will support the functions labeled as required. (__10__ of 10 points)

Technical Quality of Analysis (__41__ of 50 points)

The system is divided into meaningful classes. The overall organization of the system is presented.
(__14__ of 15 points)

See comment on overall class diagram.

The design is complete and it is clear how implementation of the model classes will proceed from this point.
(__27__ of 35 points)

Overall not bad. See specific comments in doc.

Don't forget style guide. Constructors and classes start with capital letters and methods and variables start with lower case letters. Also don't forget return types for methods.

The design presentation said to include four scenarios other than login and logout. Add another one in version 2.
